The maximum torque must not be more than 25% above the recommended tightening torque. Higher tightening torque may result in the damage of the toolholder.

Higher clamping force of the clamping nut means higher stress on the toolholder. We recommend the use of REGO-FIX® torque wrench. REGO-FIX® will not be responsible for damage to toolholders or spindles of other manufacturers.

Torque wrenches and matching products see page 13.03/13.04
